Nursing Informatics | NANDA NIC NOC-expert | AI & Robotics in Healthcare

Amsterdam, North Holland, Netherlands

## Summary

An intrapreneur in Health Care, focusing on innovation and creative thinking to get the best workable solution to make Care better for patients and professionals.

Advocating for Standardized Nursing Languages in Electronic Health Records to incorporate truly patient-centric data with other traditional medical and administrative data to reflect the breadth of patient care and influence strategic decisions. The aggregation of nursing data and the related nursing mappings will provide valuable clinical data sets to complement existing administrative data sets comprised largely of medical diagnoses, procedures and financial information.

---
